# FOREWORD

This is the forty-third publication of the Annual Report of Financial Transactions Concerning Streets and Roads of Cities and Counties of California.

Approximately 2.5 billion dollars was spent during the 1989-90 fiscal year on streets and roads. The charts and tables contained in this publication reflect transactions in monies made available and expended for construction and maintenance on our vast network of streets and roads.

We extend our sincere appreciation to the many officials of local governments for their contributions to this report.

# INTRODUCTION

The various tables of this report were prepared by the Division of Local Government Fiscal Affairs of the State Controller's Office from data contained in reports filed by cities and counties under the provisions of Sections 2151 to 2154 of the California Streets and Highways Code. These sections require city and county to file an annual report of expenditures for street or roads purposes. This report is due to the State Controller's Office on or before October 1 following the close of the fiscal year.

In accordance with the requirements, 58 counties and 455 cities filed reports. Of the 455 cities, four were newly incorporated cities during the fiscal year 1989-90. All cities and counties have a July 1 - June 30 fiscal year except for the City of South Lake Tahoe which has a fiscal year of October 1 - September 30.

All counties are required by the Government Code to report on a modified accrual basis. Cities maintain their records on a cash basis, or modified accrual basis. With respect to those on the modified accrual basis, the term "restricted balance" used throughout this publication should be considered as the excess of current assets over current liabilities.

The monies make available to local agencies for street or road purposes are derived from Federal, State and Local Funds. Accordingly, this report contains all monies made available from such revenue sources as Highway Users Tax (Gas Tax) apportionments, district roads taxes, special assessments, street, road or bridge taxes and proceeds from sale of bonds restricted exclusively to expenditure on streets and roads. Where monies received were available for expenditure on streets and roads, but not restricted to these expenditures, such monies are reported only to the extent of actual expenditures during the 1989-90 fiscal year.

Table 14 is the exception to the above statement. This table reflects street or road purpose expenditures from other than the treasury of the reporting agency and records expenditures by other governmental agencies or private parties. The expenditures set forth in this table are not included in the other tables of this report.

With the schedules and charts for the five-year period July 1, 1985 through June 30, 1990, included herein, this report with those preceding it provides interesting the informative data regarding the improvement of streets and roads of California.

* Amounts eliminated represent contributions from Counties to Cities. Since the reporting agencies are required to report all the expenditures made on their streets or roads, the contributions received by the cities will be reflected in their reports of expenditures. Thus, to avoid duplication, the contributions should not be considered as a part of the grand total of expenditures made for street or road purposes of the agencies making the contributions.

## City and County Expenditures

Cities and counties reported combined expenditures of $2,462,949,627 for street and road purposes during the 1989-90 fiscal year. This is an increase of $232,300,931 or 10.4 percent from the previous fiscal year. Subsequent pages of this summary give the major classes of street and road expenditures and show pertinent amounts together with applicable percentages.

Work performed by one governmental agency on another agency's street or road system is not reflected in the above expenditure amount. Details of these expenditures, which reflects an decrease of $5,789,177 from the previous year, are shown in Table 14.

Chart 1 shows combined city and county expenditures for streets and roads during each of the last five years.
