

*California Uniform Construction  
Cost Accounting Commission*

June 8, 2011

Mr. Gregory Schmidt  
Secretary of the Senate  
The Capitol  
Sacramento, CA 95814

**RE: California Uniform Construction Cost Accounting Commission 2007 Annual Report to the California State Legislature**

Gentlemen:

The activities and operations of the California Uniform Public Construction Cost Accounting Commission (Commission) for 2007 are listed below:

- The Commission met on July 27, 2007. The meeting was chaired by Eddie Bernacchi, representing subcontractors.
- Participants who have adopted the Uniform Public Construction Cost Accounting Act (Act) increased 30.5%, from 475 agencies to 620 agencies.
- The Commission initiated discussions of any needed changes in the Act and to identify sources of funding for activities the commission is obligated to implement.
- Discussion of whether issues related to publicly owned utility systems might have to be addressed through legislation. Further analysis is needed.
- The commission discussed some of the concerns that arise between maintenance, reconstruction and new projects and agreed to continue to assess the issues.
- The Commission is exploring the need for by-laws for the commission.

The Commission felt that the lack of funding continued to be a restraint on its ability to effectively administer the Act. As the Act's participation increased, it was expected that there would be a significant increase in the amount of administrative needs, which the Commission would be unable to provide without adequate funding.

Respectively submitted,

Guiselle Carreon, Chair  
California Uniform Construction Cost Accounting Commission

cc: Office of the State Controller
