GENERAL INFORMATION

Section K 001: INTRODUCTION (Revised 12/00)

The Payroll Input Process (PIP) System is the on-line system used to key PIP documents. The documents used to enter information onto the system are the Time and Attendance Report (Form 672), Report of Absences Without Pay (STD. 603), Miscellaneous Payroll/Leave Actions (STD. 671), Employee Time Certification (form STD. 966), Pay Adjustment Request (form STD. 683) and the (CSU) Student Assistant Attendance Report (Form CD 048).

Note: Only instructions for keying on the PIP system are covered in Section K. Refer to the following sections for document completion instructions and PIP exceptions:

Section D	Regular pay (Form 672)
	Absences Without Pay (STD. 603)
	Employee Time Certification (STD. 966)
	Pay Adjustment Request (STD. 683)
Section G	Miscellaneous Pay (Form 672/STD. 671)
	Fringe Benefit/Employee Business Expenses (Form 672/STD. 671)
Section E	Disability Pay

Section K 002: SYSTEM ACCESS (Revised 05/21)

PIP is accessed from the State Controller's Office Production (SCOPROD) monitor.

On-line keying is available 6 a.m. - 7 p.m. on the days that PIMS is active (see "Civil Service Decentralized Calendar" OR "CSU Chancellor's Office/Campus - State Controller's Office Employment History and Payroll Schedule").

If extended hours are required, email Data Guidance at DGEHDB@SCO.CA.GOV; twenty-four hours advance notice is required prior to making the request.

Section K 003: PROCESSING BATCHES (Revised 12/00)

The system will identify batches to be extracted and processed by batch status. There are five categories of batch status:

Closed (CLS) = completed batch ready to be processed

Deleted (DEL) = deleted batch, inactive

Empty (EMP) = contains no selected records to be processed

Processed (PRC) = extracted and processed batch, inactive

Saved (SAV) = suspended batch not ready for processing

The system will begin extracting batches at approximately 4:00 PM. Only batches identified as Closed will be extracted and processed in the first available Payroll Cycle. Processing will be done daily except on days identified as "NO PAYROLL CYCLE" or when in an emergency, a Payroll Cycle must be canceled.

Section K 004: BATCH MAINTENANCE (Revised 12/00)

Batches remain on the system for approximately three months from the CREATE DATE and are purged once a month the day after monthly payroll cutoff (e.g., all batches created January 1993 are purged the day after April 1993, monthly payroll cutoff 4/22/93).

Section K 005: BATCH CONTROL (Revised 12/00)

Batch controlling is a checking mechanism used to insure that the number of employee records, days, hours and rates are keyed correctly. The system will compare operator tabulated totals (keyed from the Batch Entry Control Form) with the system computed totals (based on the employee records keyed into the system).

Section K 300: INTRODUCTION (New 08/93)

This section contains miscellaneous information regarding PIP. Specific information may be found on the following pages:

Content	Reference Paragraph
Pay Problem Resolution	301
Commands	302
Update and Inquiry	302.1
Update Only	302.2
Inquiry Only	302.3
Copy Batch Process	303

Section K 301: PAY PROBLEM RESOLUTION (New 08/93)

It is the campus/department's responsibility to determine the source of the pay problem and take corrective action. Listed below are suggested research steps:

STEP 1 -   Verify PAY HISTORY.

Access pay history through the HIST application for the pay period in question. HIST can answer many questions depending on the situation. For example, regular pay has not issued; therefore overtime will suspend and not issue, or it may show that pay issued in a subsequent payroll cycle or that the transaction is a duplicate request.

STEP 2 -   Verify the PIP Batch.

a) First verify the BATCH STATUS. To verify the Batch Status, access the BATCH INQUIRY (BCH) screen, refer to K 402. The Batch Status is located in the upper right corner of the BATCH INQUIRY screen. If the Batch Status is SAV (Saved), it must be closed to process (access the BATCH ENTRY screen and close the batch). If the Batch Status is CLS (closed), it will be processed in the next Payroll Cycle. If the Batch Status is PRC (processed) continue to b.

b) Access the detail screen to verify the keyed record(s) with the source document(s). Check all items for accurate keying.

STEP 3 -   Verify documentation.

a) Some transactions cannot be keyed on PIP and must be sent to PPSD for processing. Refer to the EXCEPTIONS section pertaining to the document being keyed.

b) Verify that all required fields were completed correctly.

STEP 4 -   Verify Employment History or CSU SPAR information.

Information keyed from source document must agree with the employee's Employment History SSN, name and position number.

STEP 5 -   Check the SUSPENDED TRANSACTIONS LIST.

If your department/campus has access to this listing, it can help identify transactions that have suspended and the reason.

STEP 6 -   FINAL STEP

If you are unable to determine source of the problem and have exhausted research steps, contact the Telephone Liaison Unit for assistance. (See A013.)

NEVER RE-KEY A DOCUMENT BEFORE FIRST DETERMINING AND CORRECTING THE PROBLEM!

Once an error has been identified, it may be resolved using one of the following:

1. Re-key the corrected payment request(s) in a new scratch batch. If an entire batch is incorrect, the batch can be copied (see Copy command page K 302.2) and corrections made to the new batch prior to processing.

2. Take no action (i.e., if the transaction is correctly suspended on the Suspended Transaction Listing or if the transaction was a duplicate request).

3. Submit documents to correct Employment History.

4. Submit STD. 674 or STD. 671 to PPSD as required.

Section K 302: COMMANDS (Revised 12/00)

Various commands are used on PIP screens. The commands are listed in 3 groups which identify the capacity for their use. These groups are:

1. Update and Inquiry (See K 302.1)
    - Refresh and Change Function Commands
    - Paging Commands
    - Transaction Format Commands
    - Miscellaneous Screens

2. Update Only (See K 302.2)

3. Inquiry Only (See K 302.3)

Each Command listed includes the Control Key programmed for the command (when applicable), command name to be entered in the ACTN field and the description/use. Some commands also include additional information explaining the "step by step" procedures.

Section K 303: COPY BATCH PROCESS (Revised 09/22)

The Copy Batch Process is a time saving feature designed for the Payroll Input Process (PIP) system. It can significantly reduce entry time for groups of employees who consistently receive the same type of pay on a monthly basis. The following instructions must be used to maximize the benefits of the copy process.

I.   Establish an Original Document

After identifying a group of employees/transactions that are keyed from month to month (e.g., overtime, shift, dock, premium payments) complete the appropriate document (STD. 603 or STD. 671) with those fields that are consistent from month to month and make copies to use for future months.

II.   First Month's Procedures

A.   Complete/code the document.

B.   Key the first month's entries into a Scratch Batch (see PPM Section K 200).

NOTE: Special procedures are needed for employees that are not being docked or receiving pay in the initial month. Complete the line entry with the appropriate information (SSN, position, etc.) and enter .01 in the hours field.

C.   After all entries have been keyed SAVE (PF6) the batch. The system will then return to the Batch Entry screen.

IMPORTANT
If applicable, enter the format (DCK or MIS) and remove the "X" in the OK field for all entries added per the NOTE in item B above.

D.   SAVE (PF6) and balance the batch. If balanced, CLOSE (PF5) the batch for processing.

E. Retain the Batch ID number which will be used for next month's pay. (SUGGESTION: Note the Batch ID on a Batch Control form and save it for the next month's processing.)

III.   Second and All Subsequent Months

A. Complete the document.

B. Access the processed batch from the previous month (if Batch ID is not known, use the Batch Selection screen to locate the Processed batch).

C. From the Batch Entry screen of the Processed batch key CPY in the ACTN field and key the desired Pay Period Type, Month and Year in the PAY PER field located in the bottom right corner of the Batch Entry screen. Press the ENTER key.

D. The system will create a duplicate of the original batch and assign the information to a new Batch ID with a "Saved" status. In addition, each format screen within the batch will be updated with the Pay Period Type, Month and Year identified in the PAY PER field.

E. Update the BATCH ENTRY screen and the detail screen records. After all entries have been completed SAVE (PF6) and balance the batch. If in balance, CLOSE (PF5) the batch.

F. Retain the Batch ID number for the next month's process.
