California State Payroll Project (CSPS) Making Progress

The California State Payroll System Project (CSPS) is delighted to report the draft vendor solicitation package has been submitted to the California Department of Technology (CDT) for review. This represents a tremendous amount of work by the CSPS Project Team in partnership with California Department of Human Resources, CDT, and subject matter experts from many departments. The CSPS Project will modernize the human resource management, travel and business expense, and payroll systems used by more than 285,000 state government employees to provide accurate and timely personnel and payroll services.

To get to this point in the project, the CSPS Project Team worked closely with the potential bidder community to help ensure solicitations were as complete as possible. The CSPS Project Team conducted a bidder survey to ask relevant questions that helped inform the solicitation package. In addition, the team held a bidder forum to clarify additional requirements and discuss any final questions prior to entering a “cone of silence” with potential bidders.

CDT will now review the draft solicitation and provide feedback as necessary. Once the draft solicitation is complete, it will be formally submitted to CDT Procurement and released to the vendor community. The current estimate for release to potential bidders is February 2022; however, this is subject to change if any adjustments are needed based on feedback to the draft solicitation.
